

It's easy to see the pure, high-value difference – guaranteed at 62%  $K_2O$ .

The agriculture industry continues to face increased food production goals. With the world population expected to grow rapidly over the next 50 years, so does the demand for improved crop nutrition. To help meet these demands, we need sustainable products that maximize efficiency.

Pegasus™ is the do-more-with-less white potash that delivers optimum results. Use it to replenish your soils, harvest after harvest, to promote healthy plants for abundant yields with the best possible nutritional value.

- Consistent supply from the largest potash solution mine in the world; Mosaic has invested \$500 million in Belle Plaine expansions with additional expansions possible.
- 62%  $K_2O$  content gives you 3.3% more potassium, which equates to 40 additional pounds of K per ton – allowing for more efficient use of fertilizer.
- Pure, high-value product is easy to use. The unique white color is easy to see when applied dry.
- Lower insolubles and impurities make Pegasus well-suited for both direct application and bulk blending.
- White is the new “Green.” Reduced shipping volume and eco-friendly production using only recycled water and energy-efficient cooling ponds.

INNOVATION BY THE MOSAIC COMPANY
